

Scale Up Your
**Business
Website**
Using Elementor

ClementYo - EJM

Before was a

Page Builder Plugin

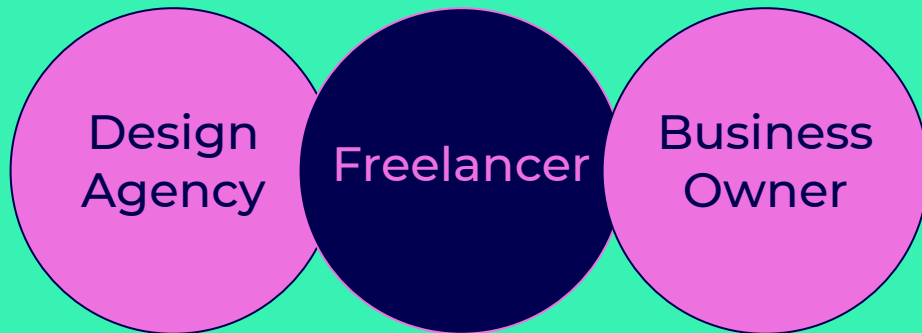

Now transforms to

WordPress Website Builder

The screenshot shows the homepage of ClementYo, a WordPress website builder. The page features a white navigation bar at the top with the ClementYo logo, a menu of links (Features, Pricing, Resources, Help Center, Blog, Experts BETA), and a 'My Account' link next to a 'GET STARTED' button. The main content area has a purple-to-pink gradient background with the headline 'The World's Leading WordPress Website Builder' and a sub-headline 'Join 5,000,000+ Professionals Who Build Better Sites With Elementor'. A large 'GET STARTED' button is centered below the text. At the bottom, there is a preview of the Elementor website editor interface, showing a 'Title' field and a 'Style' tab, overlaid on a background image of a chocolate donut with sprinkles. A red chat bubble icon is visible in the bottom right corner.

Elementor is for **EVERYBODY**

Elementor is for (almost) ANY BUSINESSES

1. Distributor
2. Property
3. Retail Chain
4. Portfolio Showcase
